Notification of timeline for 3G Device certification

Updated April 12th, 2017

New 3G devices will no longer be allowed for certification after June 30th 2017.

Devices must ENTER the AT&T lab process on or before June 30th to be eligible for certification.

In order to enter the lab the device must meet the following criteria:

1. Onboarding request must be created at www.att.com/onboarding;
2. All required documentation must be loaded in the onboarding tool and the request submitted to AT&T;
3. PTCRB certification must be completed; and
4. Device must meet AT&T TRP/TIS limits (as applicable).

3G devices that do not meet the full lab entry requirements prior to June 30th will not be accepted for AT&T certification.

This announcement does not impact maintenance releases for already approved devices.
